ACKNOWLEDGEMENTS	iv	APPENDICES	155
METHODS	v	<i>Table A1</i>	
I Incidence	v	New cases of cancer (1998) by site, age and sex, and with site-specific numbers expressed as a percentage of total new cases.	157
II Mortality	v		
III Survival	v		
IV Modifications to the I.C.D.-9 Topography Coding System	vi	<i>Table A2</i>	
CHAPTER 1		Average annual incidence rates per 100,000 population, and cumulative and age-standardized rates (Standard: World Population) with upper and lower 95% confidence limits (1998) by site, age and sex.	165
Cancer incidence and mortality, 1998.	1		
CHAPTER 2		<i>Table A3</i>	
Prevalence of cancer in South Australia.	13	Cancer deaths (1998) by site, age and sex, and with site-specific numbers expressed as a percentage of total deaths.	177
CHAPTER 3		<i>Table A4</i>	
Case survivals by place of residence in South Australia.	37	Average annual mortality rates per 100,000 population, and cumulative and age-standardized rates (Standard: World Population) with upper and lower 95% confidence limits (1998) by site, age and sex.	185
CHAPTER 4		<i>Table A5</i>	
Clinical management and case outcomes for urological cancers, as indicated by cancer registries at two South Australian teaching hospitals.	49	New cases of cancer (1977-1998) by site, age and sex, and with site-specific numbers expressed as a percentage of total new cases.	197
CHAPTER 5		<i>Table A6</i>	
Clinical management and case outcomes for colorectal cancer, as indicated by cancer registries at two South Australian teaching hospitals.	75	Cancer deaths (1977-1998) by site, age and sex, and with site-specific numbers expressed as a percentage of total deaths.	205
CHAPTER 6		<i>Table A7</i>	
The prognostic value of tumour grade, as recorded by the South Australian cancer registry.	87	Map of South Australia showing CURB Sub-regions with Local Government Areas.	
CHAPTER 7		New cases of cancer and standardized incidence ratios (SIR) with upper and lower 95% confidence limits (1977-1998) by site and sex for South Australian CURB Sub-regions.	213
Early detection of cutaneous melanomas, female-breast cancers, and cancers of the urinary bladder in South Australia.	103	<i>Table A8</i>	
CHAPTER 8		Estimated age distribution of the population, South Australia 1998.	239
Trends in places of death of South Australian cancer cases by sociodemographic and tumour characteristic.	121		
CHAPTER 9			
Descriptive characteristics of women screened through BreastScreen SA, according to whether they died of breast cancers.	133		
CHAPTER 10			
Time trends in case survival from cervical cancer in South Australia, 1977 to 1997.	139		
CHAPTER 11			
Associations between sun exposure in occupational settings and cancer risk, as indicated by South Australian cancer-registry data.	149		

#### ACKNOWLEDGEMENTS

*We would like to acknowledge pathologists and other members of the medical profession for their continued active support of the Registry. Dr. Wayne Clapton is acknowledged for providing medical and epidemiological support to the cancer registries, both population-based and hospital-based, as part of his advanced training in the specialty of public health medicine.*

*We would also like to express our appreciation to the Registrar General of Births, Deaths and Marriages and the medical records departments of the hospitals for their ongoing assistance.*
